## PH-7497-NP

## **ABSTRACT**

The present invention provides compounds of Formula (I):

$$X^{2} \xrightarrow{X^{1}} W$$

$$X^{3} X^{4} \xrightarrow{N} L_{1} A \xrightarrow{L_{2}} B$$

$$(I)$$

or a stereoisomer or pharmaceutically acceptable salt or hydrate form thereof, wherein
the variables A, B, L<sub>1</sub>, L<sub>2</sub>, X<sup>1</sup>, X<sup>2</sup>, X<sup>3</sup>, X<sup>4</sup> and W are as defined herein. The
compounds of Formula (I) are useful as selective inhibitors of serine protease
enzymes of the coagulation cascade and/or contact activation system; for example
thrombin, factor Xa, factor XIa, factor IXa, factor VIIa and/or plasma kallikrein. In
particular, it relates to compounds that are selective factor XIa inhibitors. This
invention also relates to pharmaceutical compositions comprising these compounds
and methods of treating thromboembolic and/or inflammatory disorders using the
same.
